

225MM TWINWALL 110MM SEWER 90° JUNCTION

Product Data Sheet

PRODUCT CODE - 90J225110

Depth | 435mm

Twinwall Pipework | 225mm

Sewer Pipework | 110mm

Material | Polypropylene

Weight | 2.3kg

The 225mm Twinwall/110mm Sewer 90° Junction enables the connection of twinwall and sewer pipes in underground drainage systems. This junction facilitates the redirection of flow between different pipe sizes, allowing for flexible and efficient system design. Its 90° configuration supports the smooth transfer of contents in varying directions, tailored to the specific requirements of the drainage network. Designed for compatibility with 225mm twinwall pipes and 110mm sewer pipes, this component ensures seamless integration while enhancing the versatility and functionality of the drainage system.

Installation guidance and assistance is available
